

Hands On

Stage 1 – Hacker

Next

Read Me!

Previously you have listened to the presentation of material about “Get To know Use case and sequential diagram”. In this session, you must apply the understanding that has been presented in this hands-on in the **form of your idea**.

From every application that has been given. Make:

- Use Case Identification

Identify at least five primary Use Cases and illustrate a Use Case diagram for your product

- Creating a Sequential Diagram

Choose one Use Case from the previously task and draw a sequential diagram for that Use Case
Annotate each step in detail, including decisions, loops, and function calls if applicable.

Submission

Assignments can be done by paying attention to the following:

- Assignment submission format in **pdf** format
- Can use **Indonesian or English**
- The naming format is **Team Name_App Name_Hacker Stage 1**

After completing the assignment you can upload your assignment to **Google Drive**. Then attach the google drive link to the following submission form before **January 02, 2024** at 23:59 WIB
